

I am writing in regard to the SAVI petition 01-278. I am opposed to the SAVI proposal regarding RFID operations that will impact ham radio, these additional transmissions in the ham band could cause interference and possibly ham interfere with the RFID thereby causing a lose-lose situation.

As you know ham radio is a vital resource for emergency communications, skywarn, anti-terrorism and good will. Therefore I ask the FCC to deny the SAVI petition and keep the spectrum already assigned to ham radio.

Respectfully,
Duane Whittingham - N9SSN
